

Make a lasting difference with Ellipse - and I²PL

Professional clinic owners worldwide rely on Ellipse systems for effective, long-lasting hair removal. Featuring Dual Mode Filtering and Square Pulse Technology, Ellipse MicroLight HR is clinically proven to be safe and effective. Ellipse I²PL systems are produced by Ellipse A/S and sold in more than 50 countries via an ever-expanding network of distributors.

Technical specifications

Dimensions (d x w x h)	580 x 420 x 1120 mm
Weight	52 kg
Noise	Max 55 dBA
Electrical input	100 - 240 VAC
Maximum power consumption	1000 VA
Frequency	50/60 Hz
Working temperature	15° C - 25° C
Relative working humidity (non-condensing)	10 - 75 %
Light source	Intense Pulsed Light (I ² PL)
Pulse time (min-max)	15 - 40 ms
Repetition rate	0.5 Hz
Energy range*	8 J/cm ² - 21 J/cm ²
HR-2 applicator wavelength range (min-max)	600 nm - 950 nm
Applicator foot print (spot size)	10 mm x 48 mm
Applicator weight excl. cable	500 g

Effective, lasting hair removal by Ellipse I²PL technology – enhancing your business

Note 1: For regulatory reasons the maximum limit will be 18 J/cm² in Japan

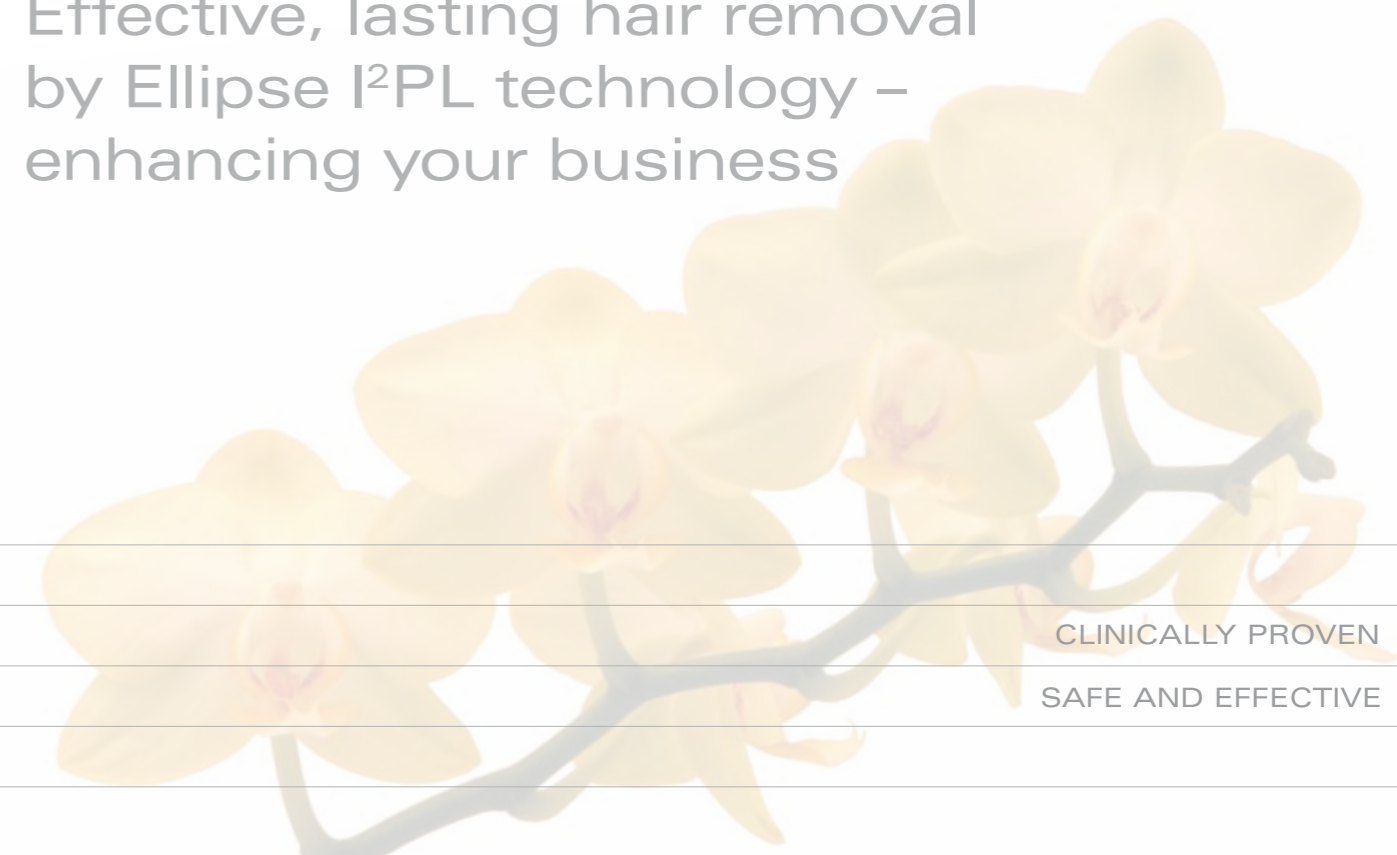

Clinical studies on hair removal by Ellipse I²PL technology:

Troilius A, Troilius C. Hair removal with a second generation broad spectrum intense pulsed light source - a long-term follow-up. J Cutan Laser Ther. 1999; 1: 173-178.
 Stangl S, Drosner M. Comparison of different methods of photo epilation. Med. Laser Appl. 17: 349 (2002).
 Bjerring P, Cramers M, Egekvist H, Christiansen K, Troilius A. Hair reduction using a new intense pulsed light irradiator and a normal mode ruby laser. J Cutan Laser Ther. 2000; 2(2):63-71.

CLINICALLY PROVEN
 SAFE AND EFFECTIVE

Your business opportunity

The Ellipse MicroLight HR puts the beauty of Ellipse hair removal within reach of just about any business-minded beauty clinic. Priced as attractively as it performs, Ellipse MicroLight HR delivers long-lasting results using advanced Intense Pulsed Light technology. That makes it an attractive alternative to painful, short-term hair removal solutions such as waxing, tweezing and shaving. Your customers will appreciate the peace of mind that comes with Ellipse, the market's leading name in Intense Pulsed Light. And you will appreciate the business opportunity Ellipse MicroLight HR offers as a natural complement to your existing services. Clinically proven to be safe and effective, Ellipse products have been relied on by doctors and beauticians since 1998. And with its easy operation and impressive hair removal results, you and your customers will quickly trust in Ellipse MicroLight HR too. Not only does it help your clients look their best – it also makes your bottom line more attractive.

A perfect match

Your customer base already includes people who are naturally interested in looking their best. And your facilities can be used precisely as they are, without any additional investment beyond Ellipse MicroLight HR itself. Ellipse MicroLight HR features easy finger-touch operation and is pre-programmed to ensure you provide safe and effective treatments. You are guided throughout the entire treatment process – simply input basic information about your client, and Ellipse MicroLight HR calculates the correct treatment parameters. Because the device itself is lightweight it is easy to move from room to room and can also be used at multiple locations.

Exceptional technology

Ellipse MicroLight HR uses Intense Pulsed Light to conduct long-lasting hair removal. This high-energy broad-spectrum light heats melanin beneath the skin surface. The melanin in the client's hair absorbs the light and converts it into heat. The hair transmits this heat into the hair follicle, which is then destroyed and rendered unable to produce a new hair.

Ellipse's unique Dual Mode Filtering technology filters the light in two ways. Called I²PL – the second generation of Intense Pulsed Light therapy – this technology ensures that only light with the correct characteristics (wavelengths) reaches the client's skin making the treatment safe and effective.

Ellipse MicroLight HR – the system of choice:

- Clinically proven performance showing one of the best hair clearance rates in the market
- Low running cost thanks to a unique and durable hair removal applicator
- Efficient and safe to use owing to Ellipse's Square Pulse Technology and patent pending Dual Mode Filtering

How to get started

Please contact your Ellipse representative to learn more about what Ellipse MicroLight HR can do for your business and request a demonstration of the system. You will see:

- How much you can expect to earn, including calculations for return on investment
- Why your customers will be fully satisfied (the before and after photos speak for themselves)
- What makes Ellipse's advanced I²PL technology so safe and effective
- How you can successfully market hair removal with Ellipse MicroLight HR to new and existing customers

Supporting you all the way

An experienced team of trainers, engineers, clinical specialists and marketing personnel is dedicated to providing you with full clinical, technical and marketing support. When you invest in an Ellipse MicroLight HR, you will have the following resources available:

- Thorough training of your staff
- Clinical workbook and operator's manual with comprehensive treatment information
- User workshops
- Case stories and treatment recommendations
- Marketing assistance and client education materials
- Technical support and service
- Clinical support
